

Smart India Hackathon 2022, is an initiative to provide students with a platform to solve some of the pressing problems which we face in our daily life. This will inculcate a culture of product innovation and a mind-set of problem-solving and provides students with an opportunity to work on challenges faced within the private sector organizations and then create world-class solutions for some of the top companies in the world. This will also help the private sector to hire the best minds from across the entire country.

In the pursuit of perfection, we often forget that ingenuity is the essence of learning. The monotonous routine of gaining knowledge and applying the same daily, seizes the joy of inventing and in the eye of this, Infusion creativity is contagious.

An internal Hackathon “INFUSION” was organized by ME-RIISE. The event was coordinated by Dr. Geetha Kiran A, Co-ordinator, ME-RIISE, Head, Department of Computer Science and Engineering. The event focused to give the best ideas from the college to SIH.

A preliminary round was conducted on 16/03/2022 where 130 teams participated out of which the best 30 teams got selected. These 30 teams were selected to present their ideas at “Infusion” that was held on 25/03/2022.

Participants with groups of 6 members presented their ideas for the selected problem statements. The interaction with Jury members was based on performance and time management skills.
